

Maltego Activity

INTRODUCTION

The **Maltego** application provides data mining and visualization capabilities, useful in footprinting and reconnaissance activities.

MALTEGO REGISTRATION

A free account is needed to use the Maltego CE software. Complete the registration process at <http://www.maltego.com/ce-registration>. Your email address, and the password you select, will be needed to run the Maltego application.

INSTALLING MALTEGO

From the Kali Linux start menu, select **01 – Information Gathering**. Next, click the icon for the **maltego (installer)**.

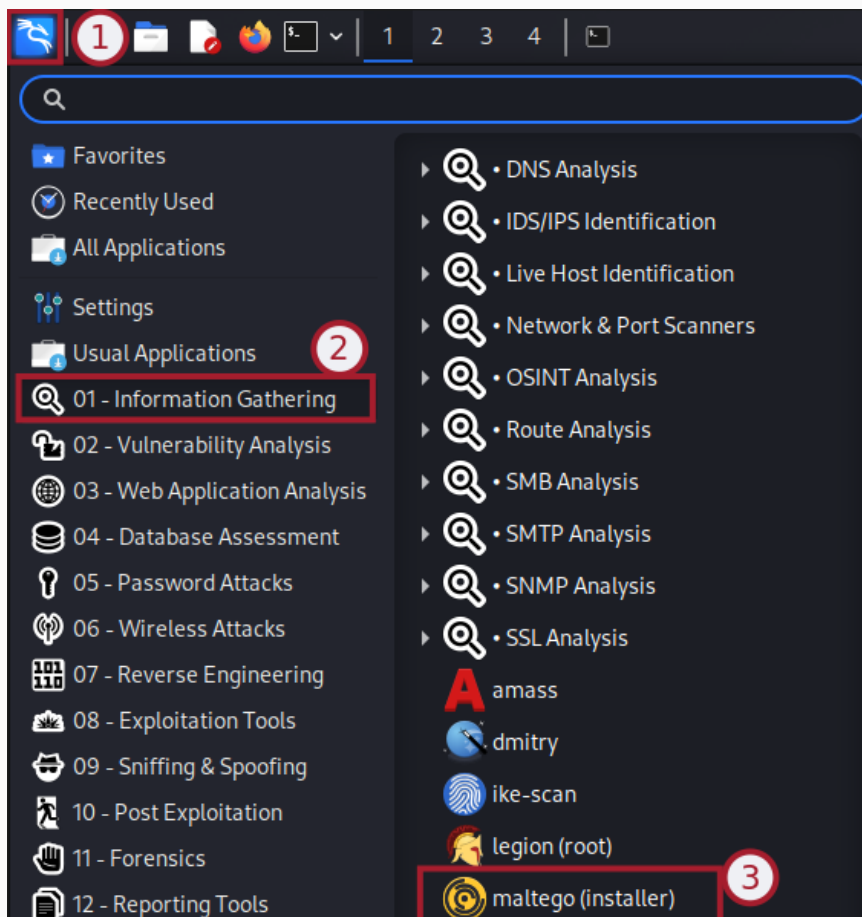

Image 1: Starting maltego (installer)

You will be prompted to install the maltego package.

```
(Message from Kali developers)
We will install the following package(s):
maltego

Do you want to proceed?
[Y/n]: Y
```

Image 2: Maltego Installation Prompt

Type **Y** to begin the **Maltego** installation. When the installation completes, press **Enter**.

STARTING MALTEGO

Return to the Kali Linux start menu. Select **01 – Information Gathering**. Next, click the icon for the **maltego** application.

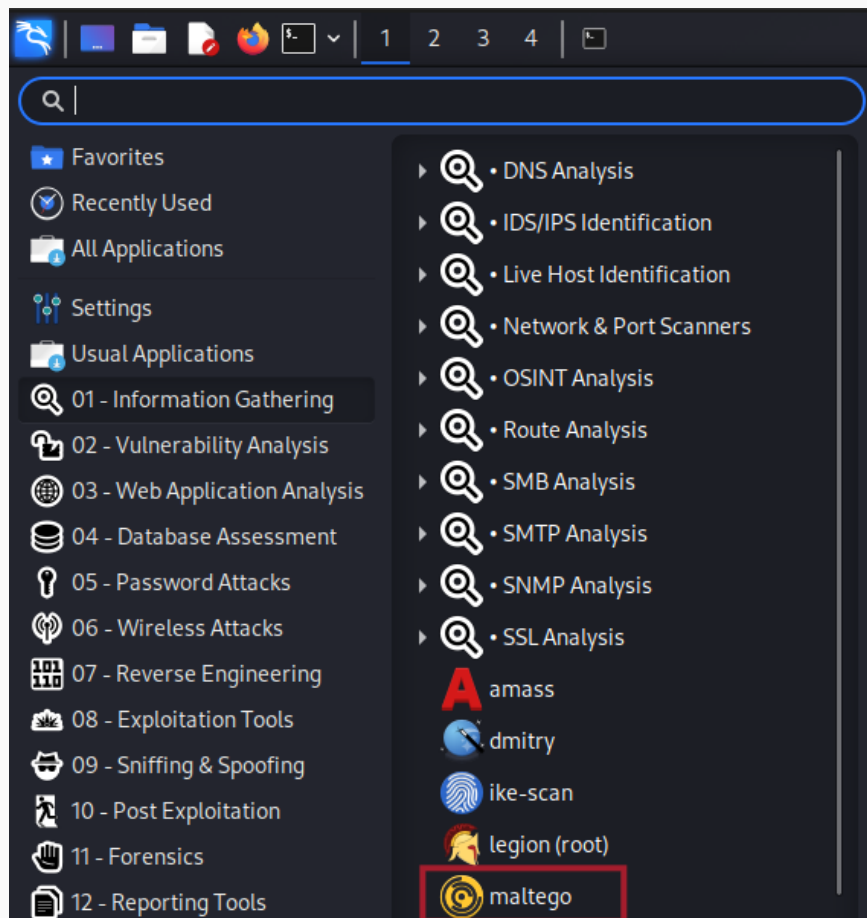

Image 3: Starting maltego

When prompted for the Product Selection, click the **run** button on **Maltego CE (Free)**.

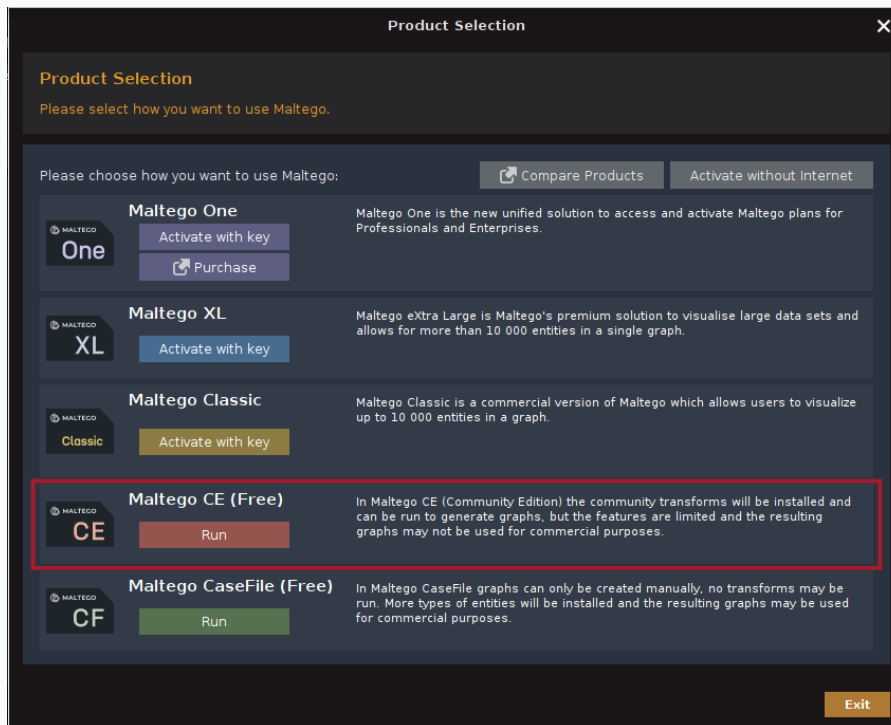

Image 4: Maltego Product Selection

When configuring Maltego, be sure to accept the license agreement.

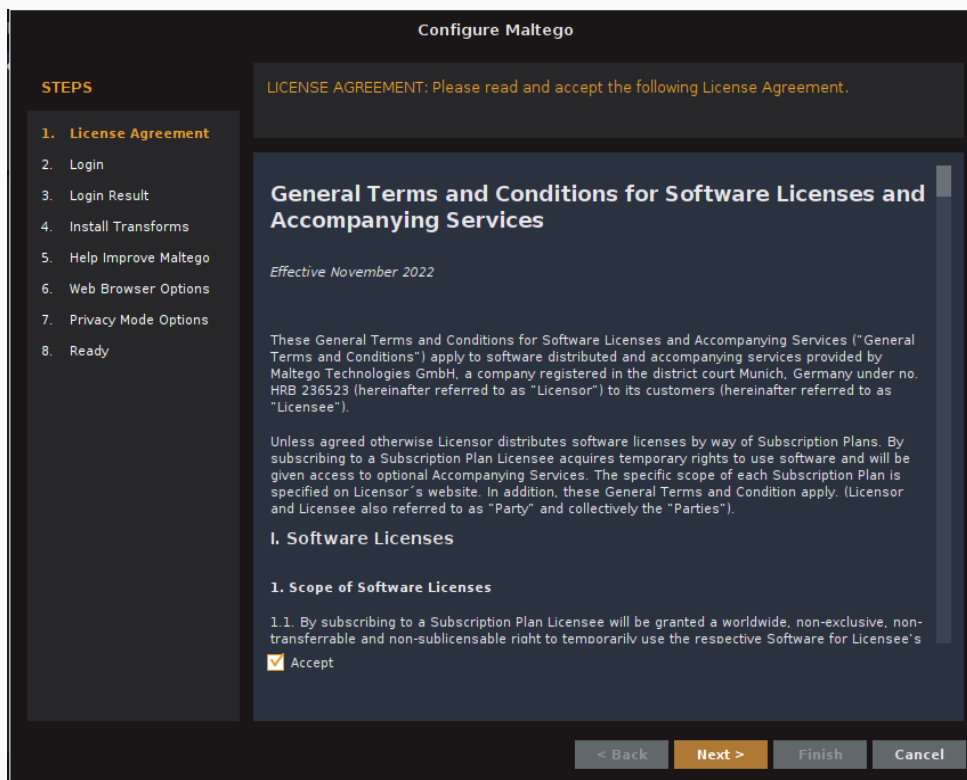

Image 5: Maltego License

Next, click the register here link to create a Maltego ID. Be sure to indicate you are a student.

CREATE MALTEGO ID			

Image 6: Maltego ID Registration

Returning to the **Maltego** configuration screen, supply your Maltego ID. Be sure to use the email address supplied during your registration process.

The screenshot shows the 'Configure Maltego' window. On the left, a 'STEPS' sidebar lists: 1. License Agreement, 2. **Login**, 3. Login Result, 4. Install Transforms, 5. Help Improve Maltego, 6. Web Browser Options, 7. Privacy Mode Options, 8. Ready. The main area has a header 'LOGIN: Please log in to use the free online version of Maltego.' Below it, a prompt says 'Enter your details below to log in to the Maltego Community Server' with a link 'Or if you have not done so yet, register here'. The login form includes fields for 'Email Address' (with a red asterisk), 'Password', a captcha image showing 'F-Y-JO', and a 'Solve captcha' field (also with a red asterisk). At the bottom are buttons: '< Back', 'Next >', 'Finish', and 'Cancel'.

Image 7: Maltego Login

If you supplied valid credentials, your login result will be successful.

The screenshot shows the 'Configure Maltego' window at the 'Login Result' step. The 'STEPS' sidebar now highlights '3. Login Result'. The main area has a header 'LOGIN RESULT: Please log in to use the free online version of Maltego.' Below it, a green message says 'Hello Nicklos, welcome to Maltego Community Edition!'. Under 'Personal details', it lists: First name 'Nicklos', Surname 'See', and Email address 'nicklos.see@bismarckstate.edu'. A note states 'Your API key is valid until February 28, 2026 at 12:00:00 AM EST'. The bottom buttons are the same as in Image 7.

Image 8: Maltego Login Result

Next, the transforms, entities, and machines will install.

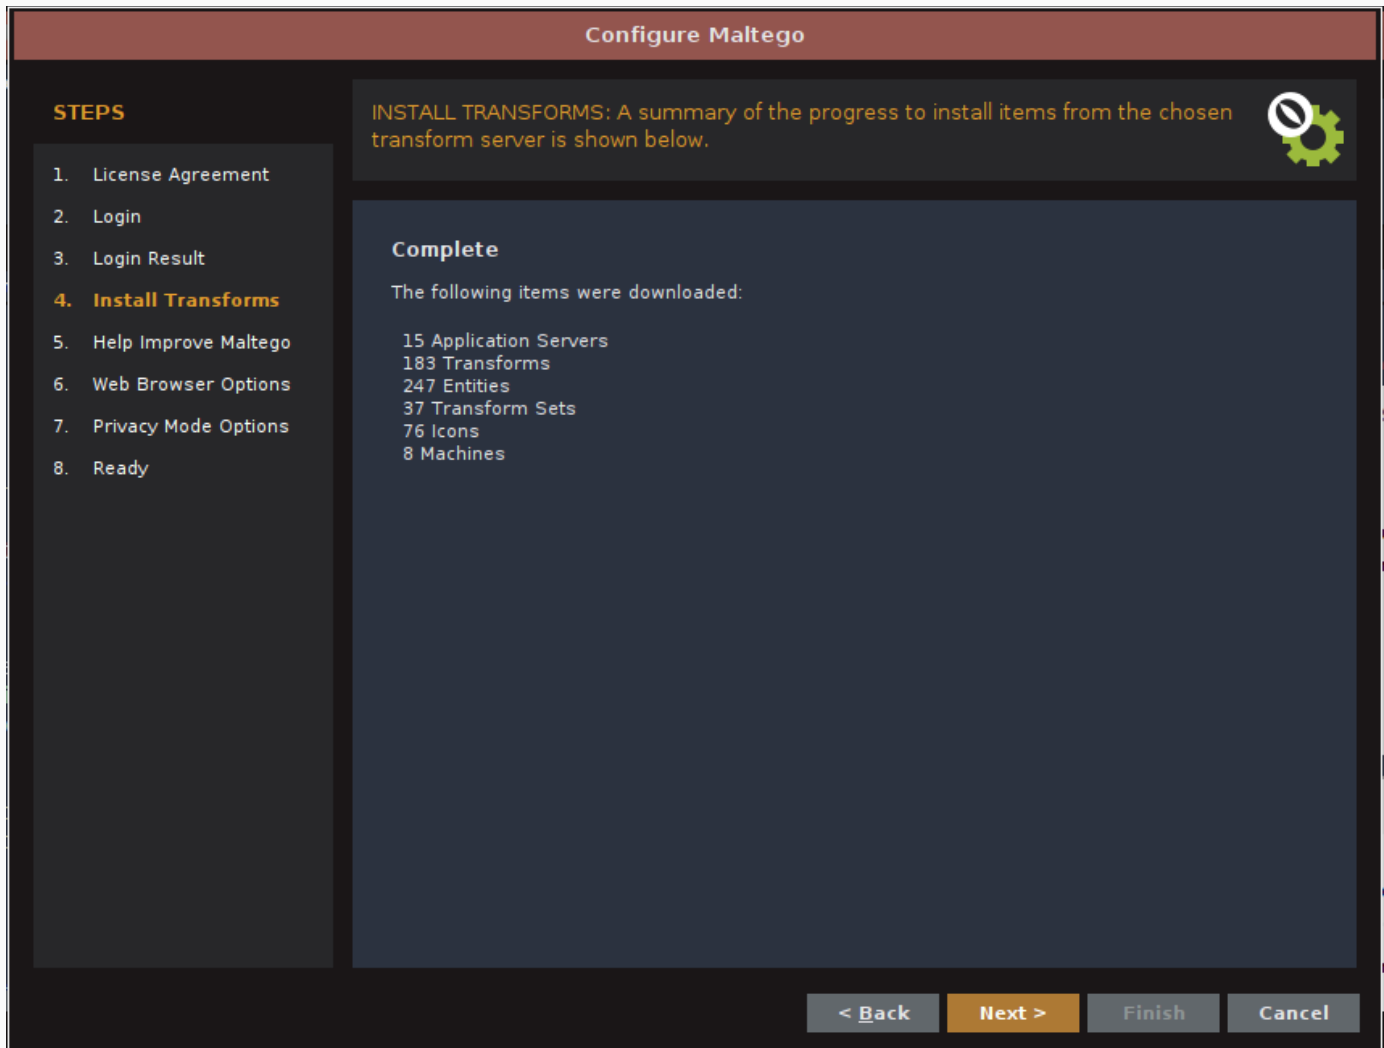

Image 9: Maltego Install Transforms

A **transform** is **Maltego** code that queries a data source, such as a search engine, DNS servers, and social media platforms.

An **entity** is something that may be discovered using a transform. Entities may include physical locations, websites, organization names, email addresses, names, phone numbers, and more.

A **machine** chains multiple transforms into an automated lookup process.

If desired, you may automatically send error reports to **Maltego** developers.

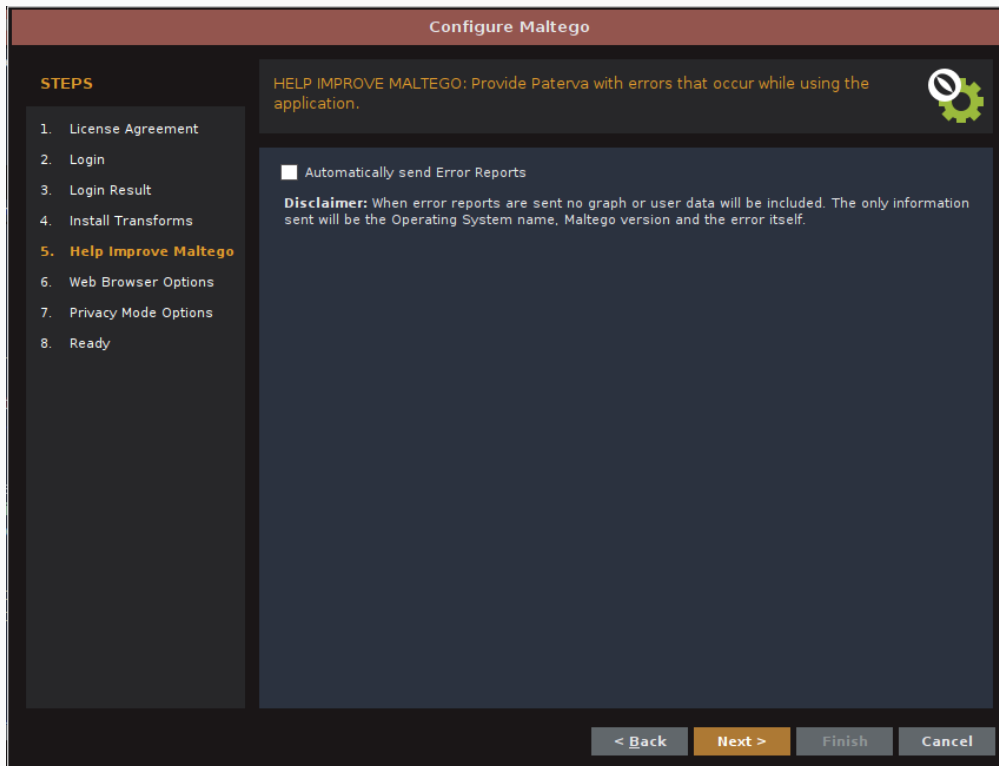

Image 10: Help Improve Maltego

You may use the default system web browser, or choose a different one.

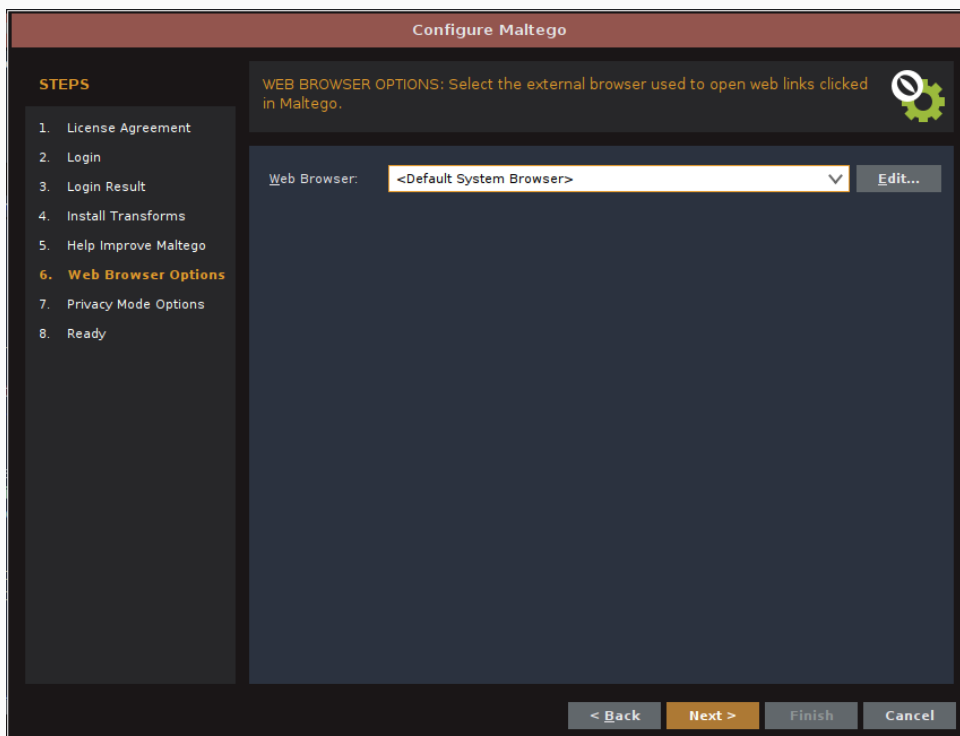

Image 11: Meltego Web Browser Selection

Use Normal privacy mode to allow **Maltego** to automatically retrieve necessary data from the Internet.

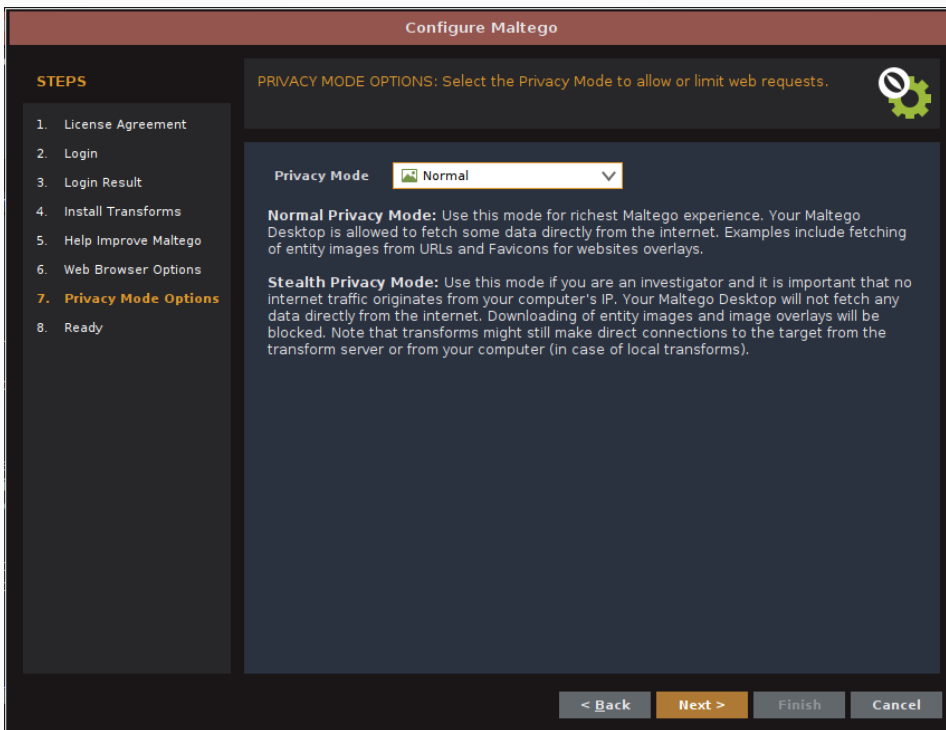

Image 12: Maltego Privacy Mode Options

Finish the **Maltego** configuration process by selecting the **Go away. I have done this before!** option.

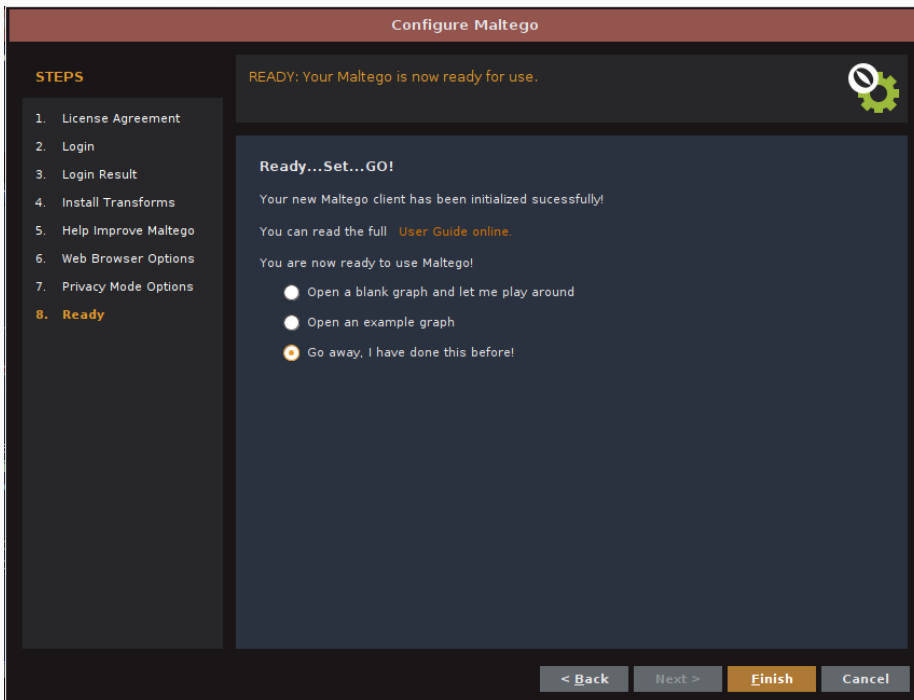

Image 13: Maltego Ready to Use

Once the configuration process completes, and the **Privacy Policy Notice** is Acknowledged, the **Maltego** application will display its home page.

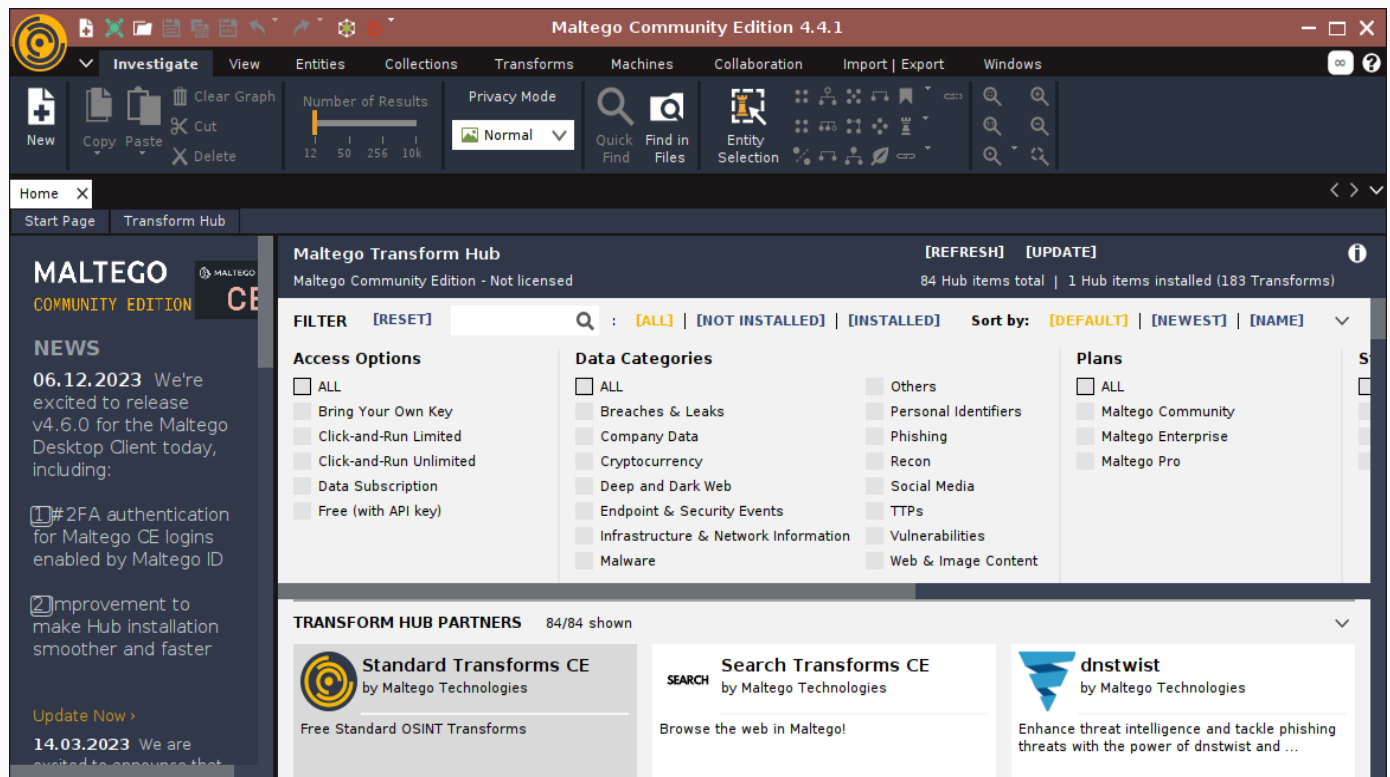

Image 14: Maltego Home Page

DOMAIN FOOTPRINTING WITH MALTEGO

Click the appropriate **Maltego** icon to create a new graph.

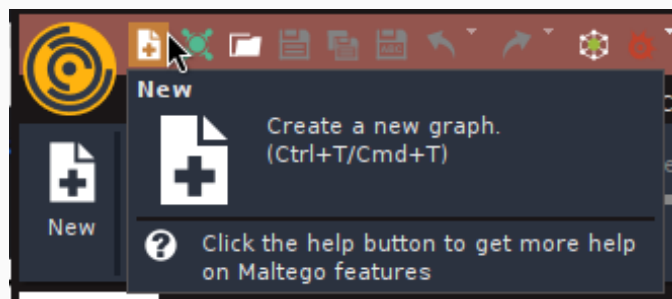

Image 15: Create a new graph

Next, select **Run Machine** from the **Machines** tab.

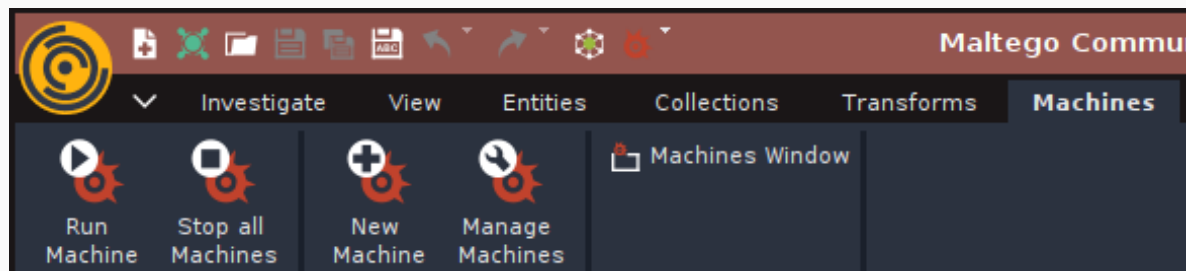

Image 16: Maltego Machines

To start, you will perform a fast and simple footprint of the bismarckstate.edu domain. Select the **Footprint L1 CE** machine. This machine includes transforms to perform basic domain footprinting.

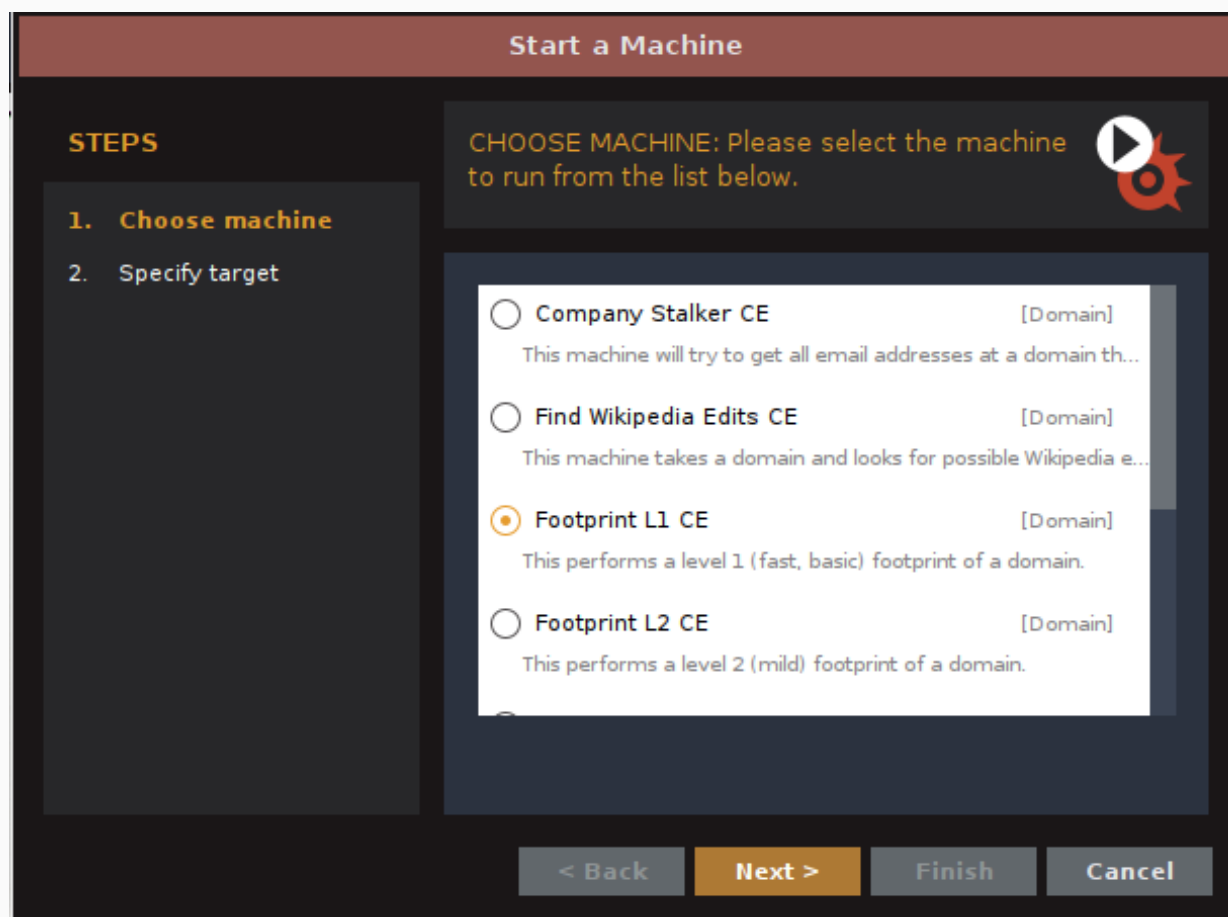

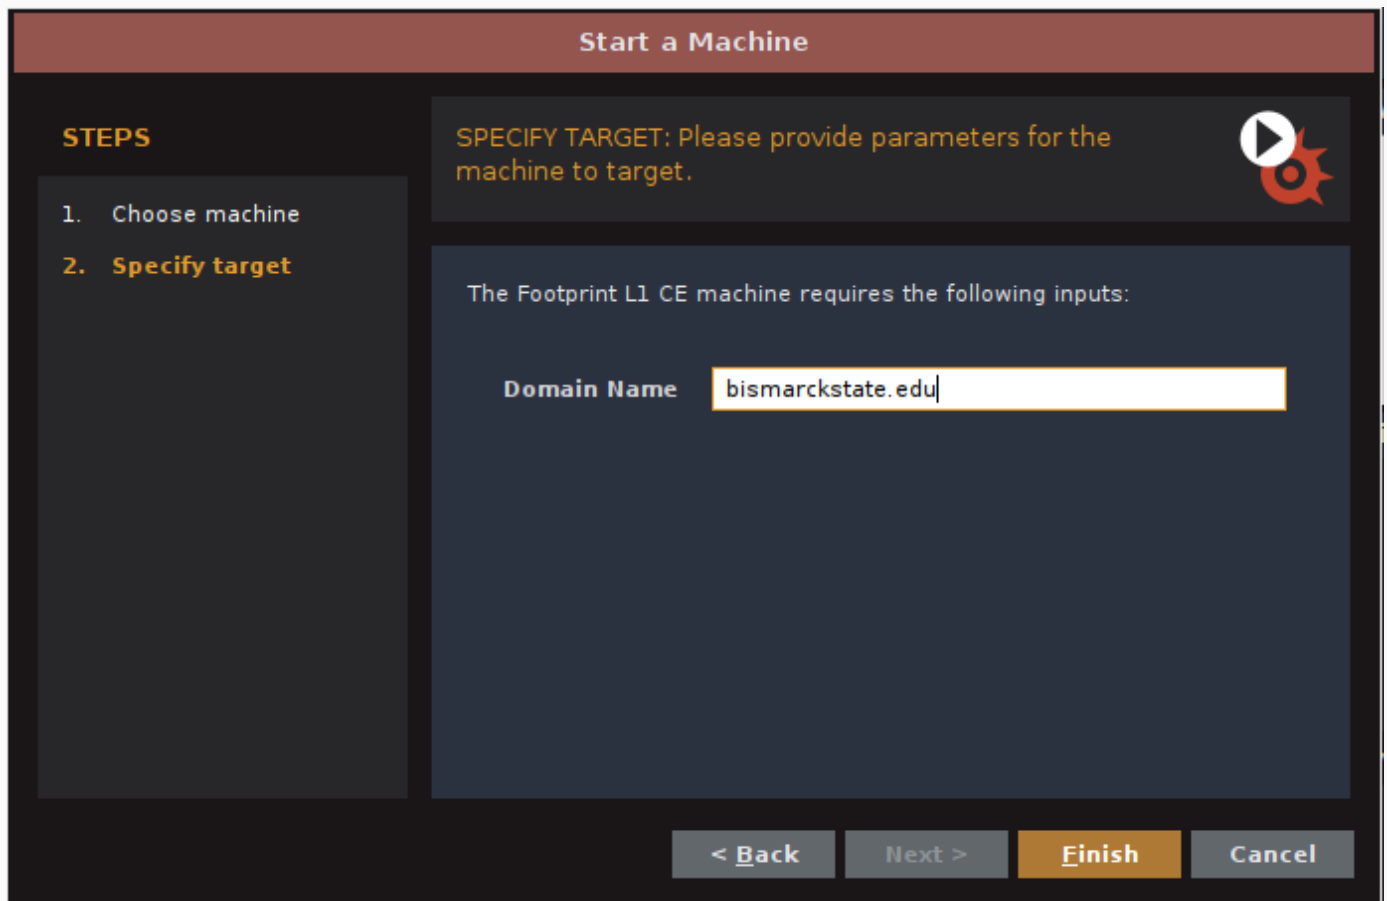

Image 17: Choose Machine

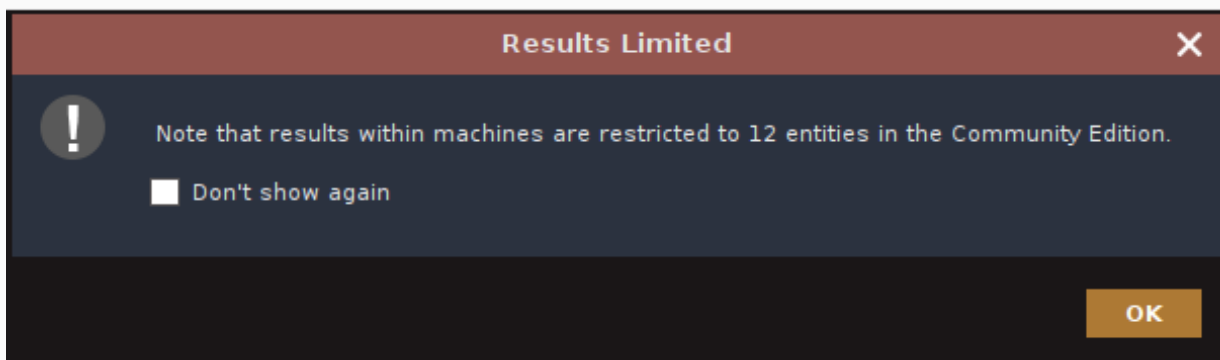

Specify the **bismarckstate.edu** domain as the machine's target.

The screenshot shows a 'Start a Machine' dialog box with a dark theme. On the left, a 'STEPS' sidebar lists '1. Choose machine' and '2. Specify target' (the latter is highlighted). The main area has a title bar 'Start a Machine' and a subtitle 'SPECIFY TARGET: Please provide parameters for the machine to target.' with a play button icon. Below this, it says 'The Footprint L1 CE machine requires the following inputs:'. A 'Domain Name' label is followed by a text input field containing 'bismarckstate.edu'. At the bottom are four buttons: '< Back', 'Next >', 'Finish' (highlighted in orange), and 'Cancel'.

Image 18: Specify Target

The Maltego Community Edition includes limitations on the number of entities a machine can show in its results.

The screenshot shows a 'Results Limited' dialog box with a dark theme. It has a title bar 'Results Limited' with a close button (X). The main area contains a warning icon (exclamation mark in a circle) and the text 'Note that results within machines are restricted to 12 entities in the Community Edition.' Below this is a checkbox labeled 'Don't show again'. At the bottom right is an 'OK' button.

Image 19: Results Limited

Maltego will locate numerous artifacts about the bismarckstate.edu domain.

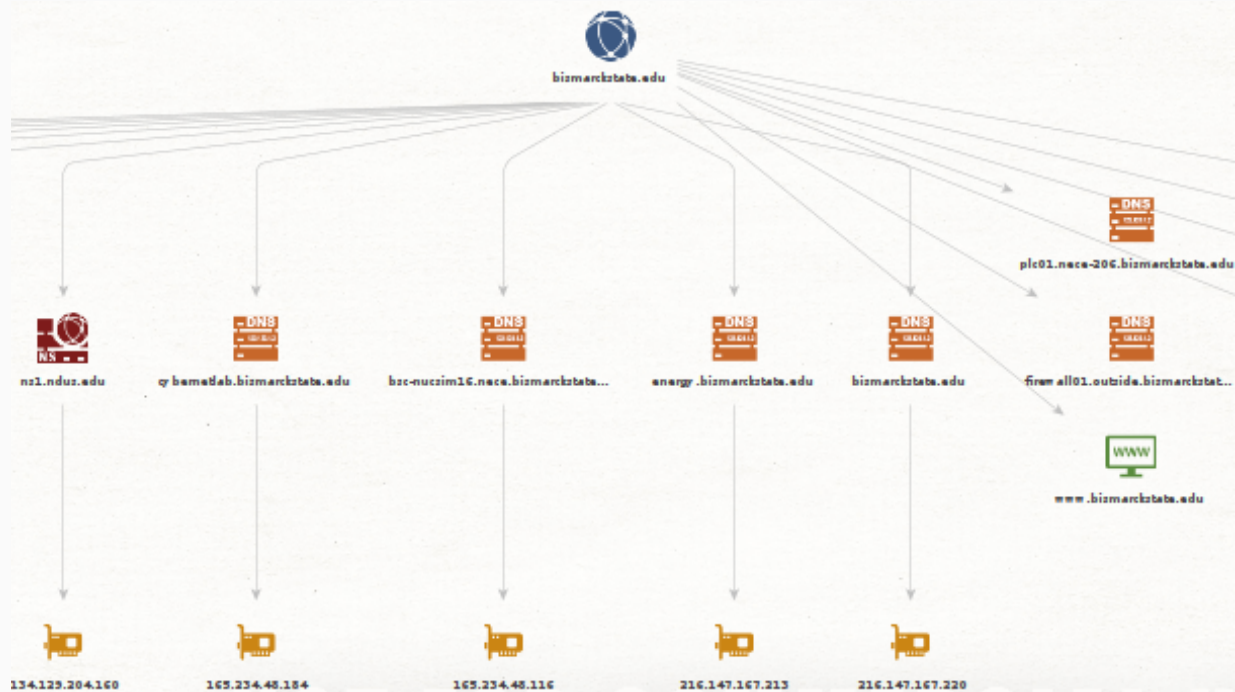

Image 20: Partial Maltego Graph

Zooming out will provide another view of the identified information. Right-click some of the identities and try some of the transforms.

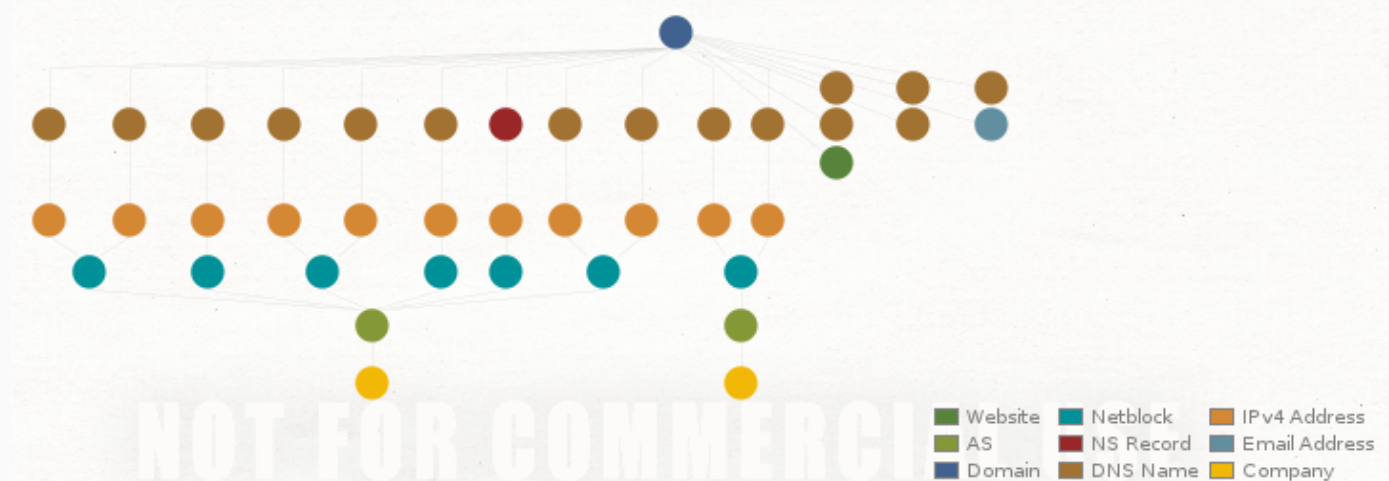

Image 21: Zoomed Out Maltego Graph

URL TO NETWORK AND DOMAIN INFORMATION WITH MALTEGO

Return to the **Machines** tab and choose **Run Machine** and select the **URL To Network And Domain Information** machine, located at the bottom of the list.

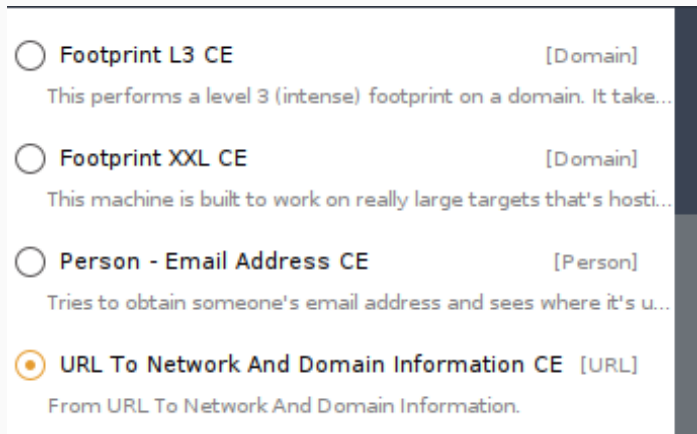

Image 22: URL to Network and Domain Information

Supply <https://www.bismarckstate.edu> as the URL target.

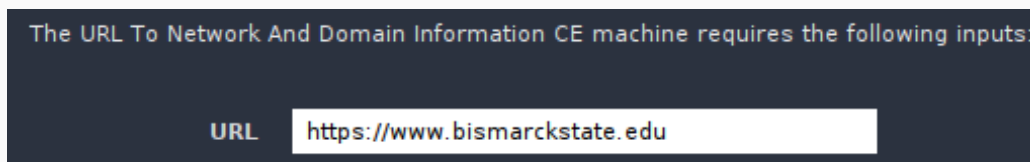

Image 23: Machine Target

Numerous entities display.

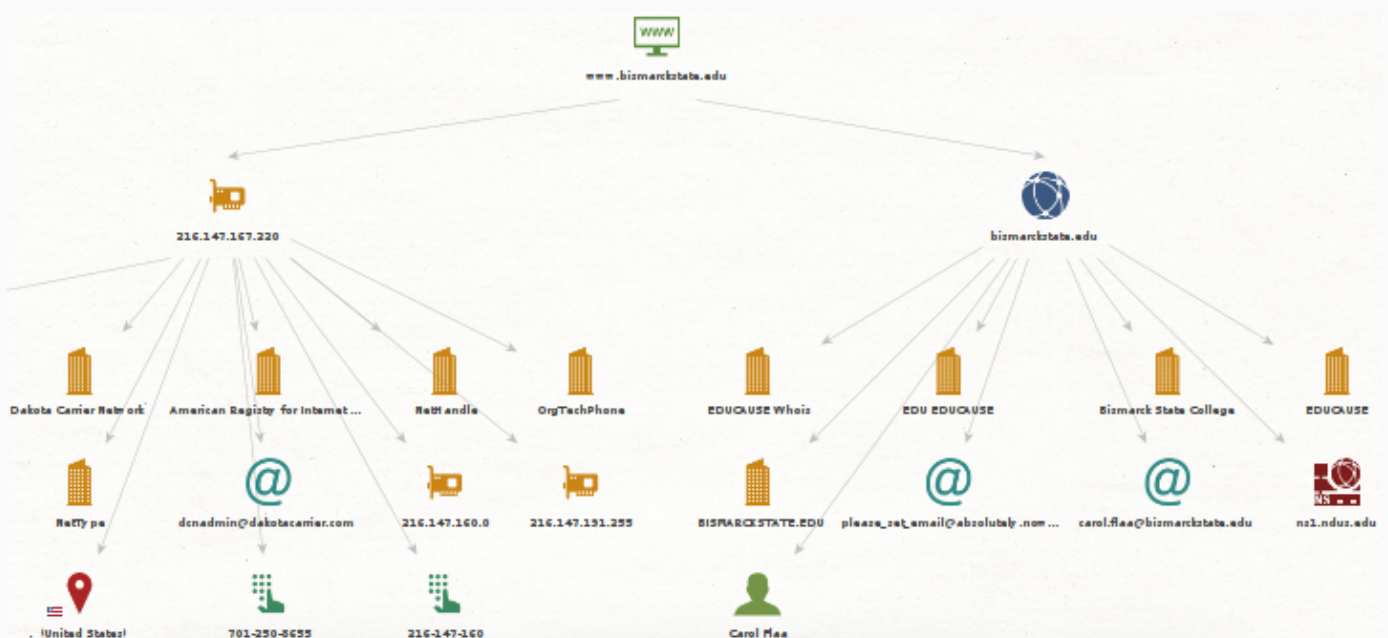

Image 24: Maltego Graph

Right-click the bismarckstate.edu domain (blue globe) and try some of the transforms, such as **Explore Historical Snapshots – To Snapshots [Wayback Machine]**.

CONCLUSION

While this activity showed only Maltego basics, the application is capable of locating much more information.
